

I am an Indiana resident who is offended by being bothered at home by telemarketers. I have been very happy with the national and Indiana Do Not Call lists. I hope that the FCC will not do anything to jeopardize the privacy we have enjoyed because of our state's list. PLEASE do not preempt this law. People today are flooded with marketing everywhere they go - it is relentless. I strongly believe that I should not be bothered in my home in this manner and hope that you will do what you can to protect this privacy. Thank you.
